

Bio Sculpture Aftercare Advice

Thank you for choosing to use the Bio Sculpture Gel Nail System, now that your nails look lovely, you need to take care of them.

- Oil-based products and strong detergents can cause the gel to lift, so always use gloves when cleaning and gardening.
- If you swim regularly, wash your hands after swimming to remove chlorine as this is a very strong chemical that can cause your gel to lift.
- After applying sun tan lotions wash your hands thoroughly or use a wet wipe as this can cause the gel to lift and discolour.

Our Hand and Foot Technician

Caroline Christer CIBTAC, ITEC, IFR, Cert Ed is the hand and foot therapist at the Hand and Foot Studio. Caroline has significant experience in the beauty industry and offers a range of hand and foot treatments in addition to and to compliment the services offered by Maidenhead Podiatry including luxury manicures and pedicures, acrylic and gel overlays.
